Fresh is Best

One of the most frequently asked questions we receive is what types or how much sod we have on-site ready for pick up or delivery. The answer to that question is pretty simple: none. The reason & explanation behind that; however, is a little more complex.

We strive to provide our customers with the freshest sod available. If we have various types or endless quantities of sod sitting on pallets ready for pick up on a daily basis, there is a chance that sod may be sitting on a pallet for a few days before it actually sells. While many people and companies enjoy the ability of picking up their sod at their convenience, or receiving a delivery on short notice, wouldn't you rather wait one or two days for sod (cont'd)

Fresh is Best (cont'd)

that was fresh cut specifically for your project? Who wants picked over sod that was already passed up by your competitors?

For these reasons, we do not have grass sitting around (i.e. dying) ready for pick up or to be delivered. Our pallets are cut fresh to order to ensure you get the best quality & freshness available. Our ordering process is simple: reach out to us, we'll give you a quote if we don't already have pricing squared away. If you agree with the quoted price, we will provide you with an estimated schedule date, the grass will be cut & you'll get it via the method of your choice (delivery, installation, or pick up).

Move Over, Florida!

Florida law requires you to **Move Over** a lane - when you can safely do so - for stopped law enforcement, emergency, sanitation, and utility service vehicles, tow trucks or wreckers, and maintenance or construction vehicles with displayed warning lights without advanced signs or channelizing devices.

- If you cannot move over - or when on a two-lane road - slow to a speed that is 20 mph less than the posted speed limit.
- Slow down to 5 mph when the posted speed limit is 20 mph or less

When you fail to Move Over, you put yourself and others at risk; you could crash into a vehicle or worker.

Violating the Move Over law will result in a fine, fees, and points on your driving record. For more information, see section 316.126, FS.

TO LEAVE US A REVIEW

Hydroseeding

Our hydroseeding crews have been working non-stop to meet our customers needs. Hydroseeding started as an alternative option for specific jobs and has turned into a great opportunity for us and our customers.

We are able to offer our customers a variety of seed mixtures, including custom mixes based on site-specific needs, determined by a soil sample. We exclusively use Profile Products for all of our hydroseeding needs and work closely with our supplier to ensure availability of products & that we are getting the best deals possible to pass on to our customers.

In the photo below, our hydroseeding crew is working to pull 450 feet of hose for hard to access areas on a 23 acre hydroseeding project we are currently working on. The great part about hydroseeding is there are so many mix options, and so many access options for hard to access areas that sod isn't ideal for.

The downside to hydroseeding is waiting for seed to germinate, as it is not an instant solution for erosion control like sod is.

ANNOUNCEMENT

SUNBELT SOD WILL BE CLOSED BEGINNING
11/20/23 AND WILL RETURN FOR NORMAL
BUSINESS HOURS ON 11/27/23
