

FDOT Spec for Sod

We are happy to work with you on your FDOT projects to meet the Department's standard specs. We are able to provide Bahia, Bermuda, or a combination of the two in both pallet & big roll form. We are able to meet the requirements for varieties, size, and installation, as well as provide you with the necessary harvest certifications after install. We also have hydroseed mixes that meet FDOT spec as well.

Ordering Sod

Our ordering process is pretty simple - you can reach out to our office by phone or email. Someone will be able to assist you with getting the necessary information for your project & if we are unable to schedule it at that time, we will promptly give you a call back to schedule. We typically schedule 2-3 weeks in advance, but will do our best to accommodate your needs. The more notice you can give us, the better.

Happy New Year!

A new year is a fresh start. We are back & better than ever, with a refreshed newsletter, remodeled office, and the employees and equipment to service all of your sod & hydroseeding needs. We plan to keep you updated with all of the sod insider tips & tricks, as well as project and industry updates. Of course we'll be sure to include our favorite recipe spotlight for those of you who like to follow along with those!

Highway Projects

Our highway projects are more than just a Prime Contractor paving roads, there are teams of subcontractors working to enhance driver safety, roadway usability & decrease congestion. Our goal is to assist by ensuring that our local roadways both aesthetically pleasing with green, vibrant landscapes, and environmentally friendly by using a natural grass that is native to the state of Florida. Proper materials, installation & maintenance are key to meeting your inspector's standards for final acceptance & providing long lasting results. By adhering to our dedication to providing quality sod material, as well as expert installation, we are proud of our partnership with our customers to provide a transformation to our local highways into scenic routes that enhance the natural beauty of our great state.

Hydroseeding Update

Our hydroseeders are on the move! Catch us throughout the state working on commercial projects of all shapes & sizes. We are happy to work with you to determine the specific hydroseed mix that suits your project's needs, whether that is one of our standard mixes or a custom mix tailored to your site soil conditions, all verified by an independent 3rd party soil testing laboratory. We have the ability to correct poor soil conditions, provide erosion control for slopes up to 1:1, and offer topsoil alternatives for hard to access areas that heavy equipment cannot easily spread healthy dirt or topsoil onto. Contact us today to learn why hydroseeding could be a good option for your project.

Notice to Owner

We prioritize protecting our payment rights & ensuring smooth project workflows. That's why we file a Notice to Owner (NTO) on every job we undertake. This critical step formally notifies property owners of our involvement, securing our right to payment under Florida's construction lien law. By doing so, we maintain clear communication with all parties and safeguard our business against potential payment disputes. Filing an NTO is a proactive measure that helps us receive prompt payments and ensures our hard work is recognized and compensated fairly, allowing us to continue serving our community with dedication and integrity. Our filing of an NTO is not a lien, nor is it a presumption that our valuable customers will not pay us, it is simply a safeguard measure to protect our interests & rights. We recommend passing this information along to your customers so they are not surprised in the event they receive an NTO in the mail, as not everyone is familiar with the process.

DIFFICULTY

NAME OF DISH

Cheesecake

CATEGORY

Dessert

PREP TIME

20 minutes

COOK TIME

4 hours in refrigerator

INGREDIENTS

Crust

- 1 1/2 c graham cracker crumbs
- 1/3 c sugar
- 1/2 c unsalted butter, melted

Filling

- 2 c cream cheese, softened
- 1 c powdered sugar
- 1 tsp vanilla extract
- 1 c heavy cream, cold

Topping

- Berries, fruit, or jams of choice

directions

Make the Crust: in a medium bowl, mix the graham cracker crumbs, sugar & melted butter until well combined. Press the mixture firmly into the bottom of a 9" springform pan.

Chill in the refrigerator while preparing the filling.

Prepare the filling: In a large bowl, beat the cream cheese until smooth and creamy. Add the powdered sugar and vanilla extract, and continue to beat until well combined.

In a separate bowl, whip the heavy cream until stiff peaks form. Gently fold the whipped cream into the cream cheese mixture until fully incorporated.

Assemble the Cheesecake: Spread the filling over the prepared crust, smoothing the top with a spatula.

Refrigerate for at least 4 hours, or until set. Overnight is best. Add toppings of choice, remove from springform pan, slice and serve.
